Stencil – a device for applying a pattern or design to a fabric or material Template – a pattern serving as a guide	Understand the need for a seam allowance. Evaluate product as going along with a final evaluation against the design brief.			the price and how much profit could be made.			Explain why their product achieves the design brief and reflect how it can be improved next time.

<p>Vegetable – Latin (vegetabilis – able to live and grow) any plant whose parts are used as food</p> <p>Caught – to catch, for example, fish</p> <p>Reared – to rear, for example, cattle and sheep</p> <p>Grown – food grown from the ground such as vegetables, etc</p> <p>Processed – foods made by humans in a factory</p> <p>Seasonal – dependent on the seasons of the year or a particular season</p>	To use scales or measuring cups, measure or weigh food items to nearest gram.	Measure accurately and calculate ratios of ingredients to scale up or down from a recipe.	Begin to evaluate their ideas and products against design criteria and how to change next time.	Understand the difference between healthy and unhealthy ingredients and what makes them that way.	Understand how different packaging can be visually appealing and unappealing, being able to tell another person why.	Testing how packaging can affect the sales of a product, using it to influence their own product.	Evaluate a food dish or item, being able to explain why they like or dislike it.	Critically reflect on different types of packaging and their impact on the environment and consumer.	Design packaging so it is visually appealing to the consumer.
